

IBID PRESS

This superb long-awaited third edition is now available. The new edition now includes: A larger page size and clearer format, New improved colour illustrations, References to the Theory of Knowledge and the International Perspective, A glossary of all key terms, Student exercises for each chapter with comprehensive answers. A complimentary student CD is also included and features the full text in pdf format, along with illustrative animations and photo gallery.

Computer Science Java Enabled: The second edition of this popular book addresses the IB Computer Science Diploma Programme with reference to the assessment statements in the revised subject guide which began in 2004. This edition is expanded and extensively revised to include the use of the Java language.

Computer Science: The Dossier: This student workbook addresses the part of the IB Computer Science Diploma course that students find most difficult — The Dossier. The purpose of this book is to help students and teachers through the following phases: *finding a suitable user and topic, analysing the problem, designing a solution, implementing, testing and documenting the solution, all to a series of deadlines.* The book has been written by a team of experienced teachers who have guided many students through the process and who have also acted as moderators.
